updated 5. 4. 2026 | published 5. 4. 2026

Summary

A large, ventilated bird feeder featuring three feeding ports, designed for easy hanging and long-lasting freshness.

Tags: [feeder](#) [birdfeeder](#)

This big (!) bird feeder is designed for those who want to attract more wildlife to their garden. The design incorporates three distinct feeding openings, allowing multiple birds to feed simultaneously.

I have integrated ventilation holes at the top of the model to allow for consistent airflow, effectively removing moisture and preventing the seeds from clumping or molding.

Please note that the provided photos were taken using a prototype printed with some older filament, which resulted in the visible surface banding. The digital files included here have been slightly refined and optimized since those photos were taken.
