Summary

Remix of IonNight's great model modified to accommodate a velcro cable tie.

This model allows you to mount a velcro tie to a table without needing glue/tape/screws. This came in handy as I wanted to manage cables behind a desk that had cheap veneer on the edges. Adhesive was peeling the veneer off and I didn't want to drill a hole in it.

I had to scale the bolt from the original model to 97% in order to make it work nicely. The uploaded step and STL files are at 100% scale. This version is designed to accommodate a 30mm desk. You can modify the STEP file easily to work with thicker desks if needed. For a thinner desk, you can modify the STEP file or use the longer bolt from the original model.

This remix is based on

Small smart clamps with holes for zip ties
