This is a storage unit and dispenser for AA and AAA batteries. It holds up to 38 AA and 35 AAA batteries.

Print the main part twice, with one side mirrored. I've also included pegs to attach the parts together. A few drops of super glue might be needed.

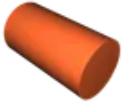

Note: On the long slide at the bottom of the AA battery compartment, the batteries sometimes spin as they roll down and get stuck. I recommend inserting the first 10 batteries from the front.

Material: PLA
Infill: 5% Gyroid
Supports: None
