removal sheet pei build flat putty

Ditch the dangerous metal spatulas! This 3D printable plastic scraper is the perfect tool for safely popping stubborn prints off your build plate without risking deep scratches on your PEI, glass, or buildtak surfaces.

Key Features:

- **Build-Plate Safe:** The plastic edge is sharp enough to get under your prints but soft enough not to gouge your expensive print bed.
- **Exposed Hex Pattern:** Features a stylish exposed honeycomb/hexagonal infill pattern on the handle for better grip and a great aesthetic.

- **Hanging Hole:** Includes a convenient hole at the top of the handle so you can hang it right next to your printer on a pegboard or hook.
- **Ergonomic Handle:** Designed to fit comfortably in the hand, allowing you to apply firm, even pressure.

Printing Instructions:

- **Orientation:** Print flat on the bed.
- **Supports: NONE.**
