Summary

A practical and elegant 3-compartment bathroom organizer for storing toothbrushes, toothpaste, and cotton swabs. The two

[Household](#) > [Bathroom](#)

Tags: [organizer](#) [bathroom](#) [hygiene](#)

The model consists of three connected cylindrical compartments of varying heights, featuring a stylish ribbed texture.

The organizer is designed to hold everything you need:

- **Toothpaste**
- **Toothbrushes**
- **Cotton swabs / Q-tips**

The model consists of two parts (the main holder and the bottom drip tray), making it very easy to disassemble and clean out any collected water.

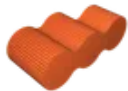

Print Tips:

- **Material:** I recommend PETG for better moisture and water resistance in the bathroom, but PLA works perfectly fine too.
- **Layer height:** 0.2 mm (an ideal compromise for nice texture rendering and a reasonable print time).
- **Infill:** 10 - 15 % (Gyroid or Grid).
- **Supports:** Not needed. The model is designed to be printed directly on the build plate without any supports.
- **Perimeters:** 2 to 3 perimeters for sufficient strength and to ensure the bottom tray is watertight.
