### Summary

Perfect for supporting weight if you want to mount your drawer system on the wall!

[Household](#) > [Garage](#)

Tags: [wallmount](#) [drawers](#) [organization](#) [drawerorganizer](#)

Designed these shelf brackets to give load bearing support for those who want to mount their drawer system on a wall.

Link to the stackable drawer system:

Note: I'd also recommend fastening the top drawer component to the wall with an anchor screw or something just to be extra safe! That way it is supported both at the bottom and the top.

Feedback is encouraged! Please post your comments & makes :)

Happy printing.
