### Bamboo wind chimes

**Bamboo wind chimes** two rows, **realistic bamboo shaped**.

Another model in the **Wind chimes collection**. Bamboo tubes in two rows.

A little more patience when assembling, but the result will satisfy you.

The hanging parts are printed - the upper plate part is Print-in-place and has 7 hooks for the tubes.

There are **4 long hooks**, for hanging the **upper bamboo tube**, and also for hanging the **knocker plate**.

Two shorter hooks connect the bamboo tube and the upper plate.

The back row is heavier, so I added a **stabilizing hook** to the upper plate so that it does not tip over backwards.

You can also **connect the parts with strings**.

**I recommend using a wider brim for a small contact area when printing tubes!!!**
